Windows Welcome Center The Windows Welcome Center automatically appears when you use the computer for the first time. You can choose to have it appear every time you start your computer by placing a check in the Run at startup checkbox. Another method of accessing the Welcome Center is to click the Windows Vista Start button, and then click Welcome Center Finding Information 17 How to use Microsoft Windows XP How to use Microsoft Windows Vista How to work with programs and files How to personalize my desktop Information on network activity, the Power Management Wizard, hotkeys, and other items controlled by Dell QuickSet. How to reinstall my operating system Find It Here Windows Help and Support Microsoft Windows XP 1 Click the Start button and click Help and Support. 2 Either select one of the topics listed, or type a word or phrase that describes your problem into the Search box, click the arrow icon, and then click the topic that describes your problem. 3 Follow the instructions on the screen. Microsoft Windows Vista 1 Click the Windows Vista Start button, and then click Help and Support. 2 In Search Help, type a word or phrase that describes your problem, and then press or click the magnifying glass. 3 Click the topic that describes your problem. 4 Follow the instructions on the screen. Dell QuickSet Help To view Dell QuickSet Help, rightclick the QuickSet icon in the Microsoft Windows taskbar, and select Help. The taskbar is located in the lower right corner of your screen. Operating System Media NOTE The Operating System media may be optional and may not ship with your computer. 18 Finding Information Find It Here The operating system is already installed on your computer. NOTE The color of your operating system media varies according to the operating system you ordered. Finding Information 19 DEVICE STATUS LIGHTS Turns on when you turn on the computer and blinks when the computer is in a power management mode. Turns on when the computer reads or writes data.

NOTICE To avoid loss of data, never turn off the computer while the light is flashing. Turns on

steadily or blinks to indicate battery charge status. If the computer is connected to an electrical outlet, the light operates as follows

22	About Your Computer	23	Solid green	The battery is charging.
			Flashing green	The battery is almost fully charged.
			Off	The battery is adequately charged or external power is not available to charge the battery.

If the computer is running on a battery, the light operates as follows

			Off	The battery is adequately charged or the computer is turned off.
			Flashing orange	The battery charge is low.
			Solid orange	The battery charge is critically low.

**KEYBOARD** The keyboard includes a numeric keypad as well as the Windows logo key. **DISPLAY LATCH** Keeps the display closed. About Your Computer 23 24 **KEYBOARD STATUS LIGHTS** The green lights located above the keyboard indicate the following

9	Turns on when the numeric keypad is enabled.
	Turns on when wireless devices are enabled.
A	Turns on when the uppercase letter function is enabled.

24 About Your Computer 25 Turns on when Bluetooth wireless technology is enabled. To enable or disable Bluetooth wireless technology or other wireless devices, press. **NOTE** Bluetooth wireless technology is an optional feature on your computer, so the icon turns on only if Bluetooth wireless technology is installed on your computer. For more information, see the documentation that came with your Bluetooth wireless technology. Turns on when the scroll lock function is enabled. **NOTICE** To avoid losing data, turn off your computer by performing a Microsoft Windows operating system shutdown rather than by pressing the power button. If the computer stops responding, press and hold the power button until the computer turns off completely which may take several seconds. **IEEE 1394 CONNECTOR** Connects devices supporting IEEE 1394 highspeed transfer rates, such as some digital video cameras.

**INFRARED SENSOR** Lets you transfer files from your computer to another infraredcompatible device without using cable connections. When you receive your computer, the sensor is disabled. For information on transferring data, see Windows Help, the Help and Support Center, or the documentation that came with your infraredcompatible device. **AUDIO CONNECTORS** Attach headphones or speakers to the connector. Attach a microphone to the connector. **HARD DRIVE** Stores software and data. 26 About Your Computer 27 **Right Side View** media bay 2 device latch release 3 USB connectors 2 **MEDIA BAY** You can install devices such as an optical drive, second battery, or a Dell TravelLite module in the media bay. **DEVICE LATCH RELEASE** Press the latch release to eject any device installed in the media bay. **USB CONNECTORS** Connect USB devices, such as a mouse, keyboard, or printer. **Back View** About Your Computer 27 28 1 USB connectors 2 2 modem connector RJ11 3 network connector RJ45 4 Svideo TVout connector 5 serial connector 6 video connector 7 AC adapter connector 8 air vents **USB CONNECTORS** Connect USB devices, such as a mouse, keyboard, or printer. **MODEM CONNECTOR RJ11** If you ordered the optional internal modem, connect the telephone line to the modem connector. **NETWORK CONNECTOR RJ45** **NOTICE** The network connector is slightly larger than the modem connector. To avoid damaging the computer, do not plug a telephone line into the network connector. Connects the computer to a network. The two lights next to the connector indicate status and activity for wired network connections. For information on using the network adapter, see the device user s guide supplied with your computer. 28 About Your Computer 29 **SVIDEO TVOUT CONNECTOR** Connects your computer to a TV. **SERIAL CONNECTOR** Connects serial devices, such as a mouse or handheld device. **VIDEO CONNECTOR** Connects video devices, such as a monitor. **AC ADAPTER CONNECTOR** Connects an AC adapter to the computer.

About Your Computer 29 30 The AC adapter converts AC power to the DC power required by the computer. You can connect the AC adapter with your computer turned either on or off. **CAUTION** The AC adapter works with electrical outlets worldwide. However, power connectors and power strips vary among countries. Using an incompatible cable or improperly connecting the cable to the power strip or electrical outlet may cause fire or equipment damage. **NOTICE** When you disconnect the AC adapter cable from the computer, grasp the connector, not the cable itself, and pull firmly but gently to avoid damaging the cable. **AIR VENTS** The computer uses an internal fan to create

airflow through the vents, which prevents the computer from overheating. CAUTION Do not block, push objects into, or allow dust to accumulate in the air vents. Do not store your computer in a lowairflow environment, such as a closed briefcase, while it is running. Restricting the airflow can damage the computer or cause a fire. NOTE The computer turns on the fan when the computer gets hot. About Your Computer 31 32 BATTERYBAY LATCH RELEASE Release the battery.

DOCKINGDEVICE CONNECTOR Lets you attach your computer to a docking device. See the Dell documentation that came with your docking device for more information. Because the computer may not automatically go into standby mode when it is undocked, be sure the settings in the Power Options control panel do not prohibit the computer from going into standby mode. If you change the Power Options control panel to prohibit the computer from going into standby mode, you greatly increase the chances of causing your battery to wear down quickly or causing your computer to overheat. AIR VENTS The computer uses an internal fan to create airflow through the fan air vents, which prevents the computer from overheating. Fan noise is normal and does not indicate a problem with the fan or the computer. HARD DRIVE Stores software and data.

32 About Your Computer 33 Setting Up Your Computer Transferring Information to a New Computer You can use your operating system wizards to help you transfer files and other data from one computer to another for example, from an old computer to a new computer. For instructions, see the following section that corresponds to the operating system that your computer is running. Microsoft Windows XP The Microsoft Windows XP operating system provides the Files and Settings Transfer Wizard to move data from a source computer to a new computer. You can transfer data, such as messages Toolbar settings Window sizes Internet bookmarks You can transfer the data to the new computer over a network or serial connection, or you can store it on removable media, such as a writable CD, for transfer to the new computer. To transfer data over a serial connection, you must access the Network Connections utility from the Control Panel and perform additional configuration steps, such as setting up an advanced connection and designating the host computer and the guest computer. This information may not be available in certain countries. Setting Up Your Computer 33 34 For transferring information to a new computer, you must run the Files and Settings Transfer Wizard. You can use the optional Operating System media for this process or you can create a wizard disk with the Files and Settings Transfer Wizard. Running the Files and Settings Transfer Wizard With the Operating System Media NOTE This procedure requires the Operating System media. This media is optional and may not be included with certain computers. To prepare a new computer for the file transfer 1 Open the Files and Settings Transfer Wizard click Start All Programs Accessories System Tools Files and Settings Transfer Wizard. 2 When the Files and Settings Transfer Wizard welcome screen appears, click Next. 3 On the Which computer is this.Do not click Next at this time.

To copy data from the old computer 1 On the old computer, insert the Windows XP Operating System media. 2 On the Welcome to Microsoft Windows XP screen, click Perform additional tasks. 3 Under What do you want to do, click Transfer files and settings Next. 4 On the Which computer is this.After the information has been copied, the Completing the Collection Phase screen appears. 7 Click Finish. To transfer data to the new computer 34 Setting Up Your Computer 35 1 On the Now go to your old computer screen on the new computer, click Next. 2 On the Where are the files and settings.The wizard reads the collected files and settings and applies them to your new computer. When all of the settings and files have been applied, the Finished screen appears. 3 Click Finished and restart the new computer. Running the Files and Settings Transfer Wizard Without the Operating System Media To run the Files and Settings Transfer Wizard without the Operating System media, you must create a wizard disk that will allow you to create a backup image file to removable media. To create a wizard disk, use your new computer with Windows XP and perform the following steps 1 Open the Files and Settings Transfer Wizard click Start All Programs Accessories System Tools Files and Settings Transfer Wizard. 2 When the Files and Settings

Transfer Wizard welcome screen appears, click Next. 3 On the Which computer is this. To copy data from the old computer 1 On the old computer, insert the wizard disk. 2 Click Start Run. 3 In the Open field on the Run window, browse to the path for fastwiz on the appropriate removable media and click OK. Setting Up Your Computer 35 36 4 On the Files and Settings Transfer Wizard welcome screen, click Next. 5 On the Which computer is this. After the information has been copied, the Completing the Collection Phase screen appears. 8 Click Finish. To transfer data to the new computer 1 On the Now go to your old computer screen on the new computer, click Next.

2 On the Where are the files and settings. Follow the instructions on the screen. The wizard reads the collected files and settings and applies them to your new computer. Microsoft Windows Vista 1 Click the Windows Vista Start button, and then click Transfer files and settings Start Windows Easy Transfer. 2 In the User Account Control dialog box, click Continue. 3 Click Start a new transfer or Continue a transfer in progress. 36 Setting Up Your Computer 37 Follow the instructions provided on the screen by the Windows Easy Transfer wizard. Turning Off Your Computer NOTICE To avoid losing data, save and close all open files and exit all open programs before you turn off your computer. 1 Shut down the operating system a Save and close all open files and exit all open programs. b In the Microsoft Windows XP operating system, click Start Shut Down Shut down. In the Microsoft Windows Vista operating system, click the Windows Vista Start button, click the arrow in the lower right corner of the Start menu as shown below, and then click Shut Down. The computer turns off after the operating system shutdown process is complete. 2 Ensure that the computer and all attached devices are turned off. If your computer and attached devices did not automatically turn off when you shut down your operating system, press and hold the power button for about 4 seconds to turn them off. Setting Up Your Computer 37 38 38 Setting Up Your Computer 39 Using a Battery Battery Performance NOTE For information about the Dell warranty for your computer, see the Product Information Guide or separate paper warranty document that shipped with your computer. For optimal computer performance and to help preserve BIOS settings, operate your Dell portable computer with the main battery installed at all times. One battery is supplied as standard equipment in the battery bay.
